

PEEGELDI

- ◆ Kinnita peegeldi kerise soovitavale küljele nii, et peegeldi ülemised haagid lukustuks ümber kerise ülevalt neljanda ribi. Jälgi, et kõik haagid on kinnitatud, et takistada peegeldi horisontaalset liikumist. Ongi valmis!
- ◆ PS! Mugava paigaldamise huvides kinnita peegeldi kerisele pärast kivide ladumist.

REFLECTOR

- ◆ Place the reflector on the heater's side so that the upper hooks of the reflector sit on the fourth rib from the top. Make sure that all the teeth of the reflector hooks lock the horizontal movement of the reflector. Well done!
- ◆ PS! For convenient installation, place the reflector on the heater after filling the heater with the stones.
